PROJECTS

Fine Woodworking by Nick Snyder

<https://nasnyder91.github.io/wood-portfolio/>

Display of image thumbnails that can be filtered by category and clicked on to display a larger version. I used various jQuery functions including animate and offset along with Bootstrap to create a photo album with an interactive layout.

SGS Cabinetry website:

www.sgscabinetry.com

Showcase of work and contact information for Steve Stroetzel, a cabinetmaker located in Annapolis, MD. I used Bootstrap modals containing a Bootstrap carousel to display examples of each image category. I also implemented the formspree.io form submission service.

Classic Game Collection

<http://www.nsclassicgames.com/>

Contains a collection of games using various javascript frameworks and libraries including ReactJS, jQuery, Bootstrap, and Phaser.

Proportion Distortion

<https://itunes.apple.com/app/proportion-distortion/id1257412093?mt=8>

Use of Swift and Xcode to create an iOS app in which users can enter and organize cooking recipes in an easy to navigate layout.

My Professional Portfolio

<http://www.snyderdeveloper.com/>

My personal portfolio that displays my projects and provides a download link for my resume as well as a contact form. Implemented jQuery to display the initial animation when entering the website. Also used Mozilla's PDF.js viewer to view my resume within a Bootstrap modal.
